

James Res. Before AC-Enhancer

James Res. With AC-Enhancer

The Top graph shows the James Residence without the AC-Enhancer. The average relative humidity in the home was 49%. This graph was run from 6/28 through 7/2. The bottom graph shows the same home with The AC-Enhancer installed from 7/3 through 7/7. The temperature in the home remained relatively constant but the average relative humidity went down to 44%. The horizontal red line on both graphs shows the 49% mark. The bottom graph clearly is consistently lower humidity.
